

Global Wearable Devices

A distributed company for the design,
and manufacturing of wearables
leveraging local expertise

The Company

- The Company started with the design and producing of Wearables in 2006 as an innovator for the “ computer watch” with his own brand “BURG”.
- Today the Company “Global Wearable Devices” is offering a complete design to manufacturing ECO system with branded and customized solutions.
- The Company has active projects in different markets as Telecom, Automotive, Health and specialized Medical projects.

USP's

- A globally operating distributed company to accelerate custom solutions:
 - Europe: leverage expertise in industrial design, sensor technology and software & infrastructure
 - USA: leverage retailing and branding
 - Far East: leverage manufacturing expertise
- Technology to support the new generation of 3G Wearable Devices & Softsim option
- Software design to support a variety of OS platforms: Android, Tizen, IOS
- Vertically distributed company secures competence of established players to secure a rapid execution and retail rollout

Projects on hand

- Medical
- Health
- Safety
- Connected wireless/bluetooth/RFID solutions

Future

- Evolution of sensors and functionality in textiles - Fashiontech
- Medical – skin patch sensors and development of flexible electronics based on nanotechnology including insertables
- Leverage the eco system to provide solutions covering the complete vertical

Global Wearables

Your Design (Hardware, Industrial & Software), Manufacturing and Retail Eco System

Wearables, FashionTech & IOT Devices

Medical – GeoFencing – Fashion – Sports – Smarthome
